This includes generators, transformers, chillers, air conditioners, heaters, compressors, aftercoolers, fuel tanks, all Tier 4 Final diesel equipment, and other similar equipment. Note that if the equipment subject to the fee is also subject to shift rates, the amount of the fee will vary in proportion to the applicable shift rate. THE FEE IS NOT A TAX OR GOVERNMENTAL CHARGE. It is used to help offset expenses incurred operating in an environmentally sound manner. To learn more about the fee, please see the terms and conditions referenced herein or Aggreko's Statement on Environmental Fees, which is available at <https://www.aggreko.com/en-us/terms-of-business>.

AFTER HOURS FEE

To cover the additional cost of labor and third party expenses incurred for equipment preparation and mobilization, an After Hours fee applies to orders executed outside of normal business hours (Monday – Friday 8am – 5pm). If ordered and subsequently canceled, the fee will be charged in addition to any other cancellation charges.

COLD WEATHER PROVISION

The customer must supply appropriate power to energize cold weather accessories, such as (and not limited to) electric block heaters, trickle chargers, heat tracers and battery heaters. In the event that the customer cannot provide power for the winterization components, Aggreko can provide the power source for an additional fee. - If the customer elects to service the equipment, proof of service must be provided to Aggreko upon request. Daily inspections of the equipment are also the responsibility of the customer. These checks should also be carried out prior to starting the equipment. The customer is also responsible for providing fuel, coolants, lubricants, and other supplies necessary to operate the equipment.

FUEL AND FLUIDS

Due to federal regulatory requirements, certain equipment with Tier 4 Final diesel engines use a special additive known as Diesel Exhaust Fluid (DEF). If DEF levels fall below a certain threshold, the unit will stop working. The customer is responsible for regularly monitoring DEF levels and providing additional DEF as needed. DEF is generally available from local fuel and lubricant providers. All diesel-powered equipment will be returned with the same amount of fuel as delivered or the customer will be subject to refueling charges. All equipment with Tier 4 Final diesel engines and DEF systems will be filled with DEF before delivery and customer will be charged therefor on its initial invoice. Delivery charges for standard on-site fueling and filling may apply. Fuel and fluid rates may be adjusted during the rental based on fluctuations in market pricing.
